

FREE OSHA Alliance Presentation

Florida Gulf Coast
Chapter

CONFINED SPACES IN CONSTRUCTION Free Workshop provided by ABC, OSHA, SUCA & United Rentals

Effective August 3, 2015, the construction industry now has its own dedicated Confined Space Standard (29 CFR 1926 Subpart AA) which is similar to the standard that covers general industry. The new standard covers all construction employers whose employees may be subject to confined space hazards. The new standard differs from the general industry standard in that it includes construction specific provisions, all confined spaces and not just permitted spaces and has new enforceable requirements. The new standard emphasizes training, air monitoring, physical hazard evaluations and communications between employers and employees. The presentation will cover the requirements of the new standard.

Confined Space Entry Equipment Demonstration and Discussion

- Gas Monitor - Calibration and Bump Test
- Tripod Rescue Kit - Winch & Harness
- Ventilation Blower - Electric vs Gas
- Pipe Plugs - Control Engulfment Hazard
